

# Polygon Capture

## GAME CARDS

On the back of each of the top eight cards (first sheet), write an “A” for angle. On the back of each of the bottom eight cards (second sheet), write “S” for side. Cut out the cards.

All angles are right angles.	At least one angle is obtuse.	No angle is a right angle.	At least one angle is less than $90^\circ$ .
At least one angle is a right angle.	At least two angles are acute.	All angles have the same measure.	<b>STEAL CARD:</b> Select a <i>pair</i> of properties. Steal all those polygons from your opponent.

No pairs of sides are parallel.	All sides are of equal length.	Only one pair of sides is parallel.	At least one pair of sides is perpendicular.
All pairs of opposite sides are parallel.	It is a quadrilateral.	All pairs of opposite sides have equal length.	<b>WILD CARD:</b> Pick your own side property.
